ABSTRACT

The annual "Florida Library Directory with Statistics" is intended to be a tool for library staff to present vital statistical information on budgets, collections, and services to local, state, and national policymakers. As with previous editions, this 2001 edition includes the names, addresses, telephone numbers, and other information for libraries of all types in Florida. In addition, there are statistics to support budgeting, planning, and policy development for Florida's public libraries. The first section consists of listings for Florida Division of Library and Information Services library organizations, councils, and associations. The second section is the directory of libraries, with listings divided by public libraries, academic libraries, special libraries, institutional libraries, and school library media supervisors. The third section consists of a narrative statistical summary of public library data compiled from forms distributed to public libraries in October 2000, as well as selected historical data. The fourth section consists of public library data tables on population served (by county); access to library service; library staff; librarian salaries; income; expenses; expenses by category; collection; circulation and borrowers; visits, reference, and interlibrary loan; programs; and electronic access. Indexes of personnel and libraries arranged by county are included. (AEF)

Katherine Harris
Secretary of State

It is my pleasure to introduce the *2001 edition* of the Department of State, Division of Library and Information Services, *Florida Library Directory with Statistics*. This directory is intended to be a tool for library staff to present vital statistical information on budgets, collections, and services to local, state and national policy makers. The straightforward format of this publication facilitates quick access to important information.

Each public library in Florida submits a statistical report to the Research Office in the Bureau of Library Development which then compiles and analyzes this data. Local library managers and public administrators use the public library data for planning, evaluation, and resource allocation. These data are also important for academic and governmental researchers investigating and developing public policy in the areas of technology and information services. The Bureau also submits the data to the Federal-State Cooperative System for Public Library Data, a program of the National Center for Education Statistics.

As we strive to provide cutting-edge technology and continue to provide our communities with quality information services, the ability to demonstrate accountability and justify funding requests is more important than ever. The *Florida Library Directory with Statistics* provides the library community with valid research that expresses the true impact of library services.

The quality of this publication is the result of a collaborative effort between local public libraries and the State Library of Florida. Thank you for your contribution in this effort.

Yours truly,

Katherine Harris
